

BUILD THE BEST CONNECTED EXPERIENCE FOR YOUR CUSTOMERS

CONNECTED SPACES

RETAIL

People today expect brilliant experiences at shopping malls. There are abundant opportunities to cater to these expectations if you transform a mall from a physical space into a connected experience that doesn't just focus on the shopping, but takes into account everything surrounding it.

Give your experience strategies a boost with Connected Spaces. Our solution combines Adobe's world-leading customer experience technology and Acxiom's ability to connect marketing technology and processes at the data layer, to better identify, understand and engage customers for greater satisfaction and incremental revenue.

KEY BENEFITS

Create a brilliant customer experience at your shopping mall, adding value where it counts:

Build relationships and loyalty with your customers at every stage of their interaction with you, before they shop, in-store and afterwards with relevant communications.

Give your customers time back with pre-shop planning tools. Let them know about parking instructions and navigation, entrance wayfinding, and pre-ordered services such as restaurants reservations, click and collect, and other amenities.

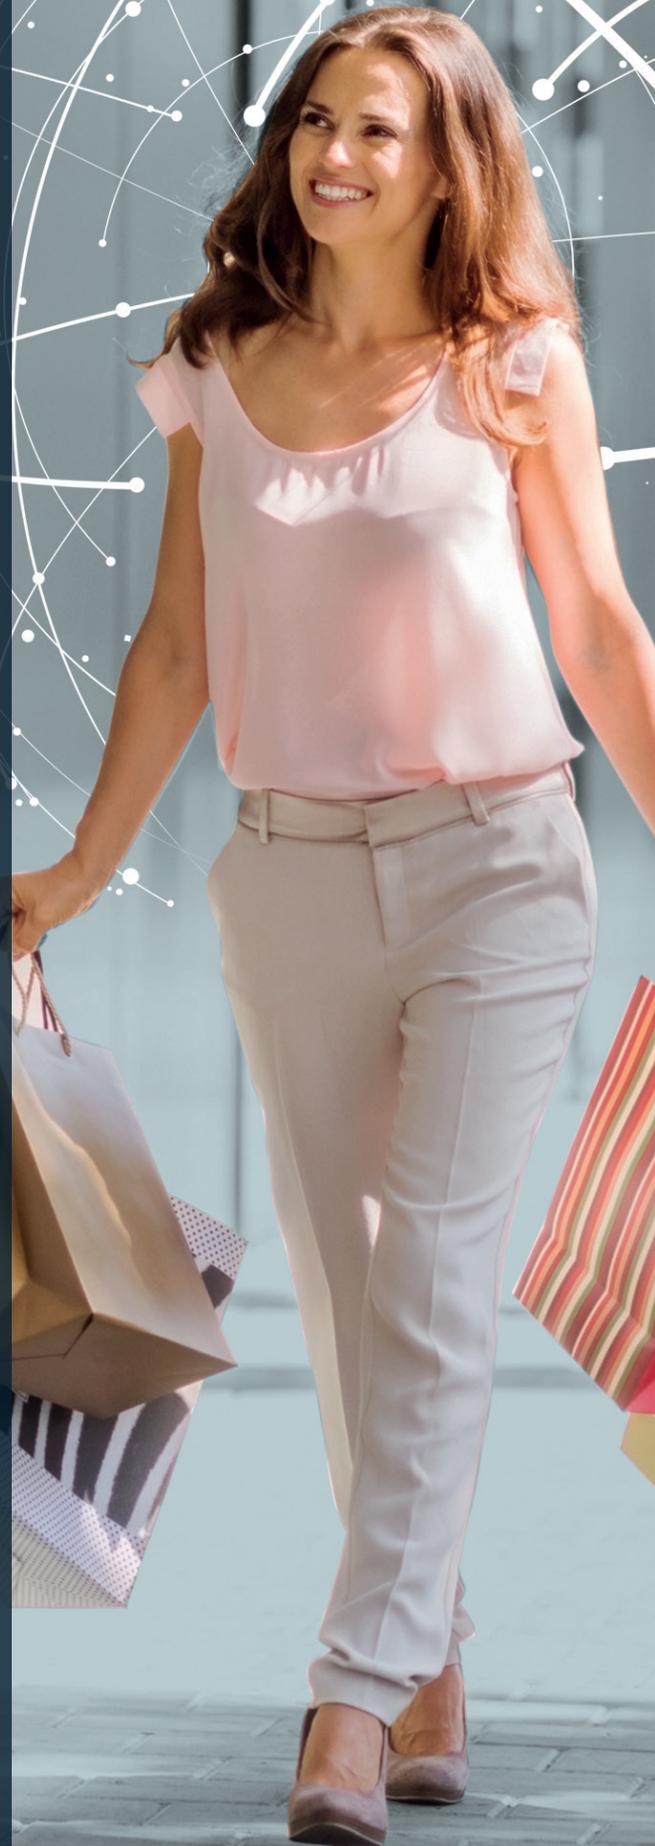

Create personalised in-mall experiences for your shoppers, by letting them know what's going on in their favorite retail outlets and across the property.

Enhance your customers' experiences with in-store thank you messages. Encourage them to tell you when they intend coming back to your location by sharing exclusive content and exclusive offers that they can enjoy next time they visit.

acxiom™

HOW CONNECTED SPACES WORKS

Connected Spaces is a fully scalable, rapidly deployed solution allowing you to get up and running with 1:1 personalised communications in a matter of weeks.

Our solution comes 'out of the box' with a set of standard data ingestion APIs, and connectors to a wide range of existing technologies, allowing signals from your customers' interactions with your existing IT architecture to be rapidly available to marketers. Additionally it has a series of optional add-ons from both Acxiom and Adobe which seamlessly integrate with the technology to expand with you as your requirements change to realise your vision.

 **ACTIVATE**
Acxiom deploys a cloud-based database component, installs Adobe Campaign and configures and installs a number of real-time data ingestion points (e.g. Wi-Fi provider, ticket provider, event app, POS system, e-commerce platform, geofence signals) and campaign workflow templates for real-time and time-based communications to get you started quickly.

 **INGEST**
Data is ingested and stored in the database to build a rich portrait of every customer enabling decisions to be made on the best offers or experiences to promote.

 **EXECUTE**
Once set up, Adobe Campaign is used for all cross-channel campaign orchestration and automation.

WHY ADOBE & ACXIOM

SPEED – Acxiom and Adobe have partnered to ensure the solution is set up and integrated in a matter of weeks – much faster than a typical marketing system – creating results and payback faster.

FLEXIBILITY – Our solution has the core of what you need to deliver great customer journeys but also understands that there are legacy technologies, data feeds and complementary solutions to integrate with seamlessly. The solution is optimised to do exactly this.

REACH – A global solution designed for multiple connected spaces wherever they may be.

PROVEN – Acxiom and Adobe, together, have delivered this solution to arguably Europe's biggest retail site in the shape of Heathrow resulting in +23% uplift in spend per visit.

COMPLETENESS OF VISION – Acxiom and Adobe's solution features a complete core offering, primed and ready to make a massive difference even before layering in the optional additional services Acxiom can bring, or investments you may make with Adobe Experience Cloud.

The best of Adobe technology with Acxiom inside.

ABOUT ACXIOM

Omnichannel Integrations

We enable a true omnichannel ecosystem to bring together digital and offline, adtech and martech, as well as data services and technology.

Ethical Data Use

We can deploy data environment architectures that provide the security protocols and processes you need to protect omnichannel data completely.

Best in Class Identity Resolution

We recognise consumers across channels and devices with high levels of accuracy using our AbiliTec proprietary technology.
